# National restoration plan (NRP)

## Part C – Measures

### 14. Measures Art.15(3)(c)

14.1.1.a Name of the measure - Full name - mandatory	Fortsatt utredning av effekter av åtgärdsförslag kontra återstående åtgärdsbehov för arterna
14.1.1.b Name of the measure - Unique measure ID - mandatory	SE_B.10_Art4_(203)
14.1.2 Main ecosystem type concerned - mandatory	B.10 Other ecosystems
14.1.2.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is the main ecosystem type concerned.	Åtgärden handlar om att skapa förutsättningar för att arbeta med arters livsmiljöer i alla/de flesta ekosystem.
14.1.3 Other ecosystem types concerned - optional	
14.1.3.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is among the additional ecosystem types concerned.	
14.1.4 Scale of planning - mandatory	a_national
14.1.4.b,c,d Scale of planning - NUTS - conditional field that has to be reported when the scale of planning is sub-national NUTS1 or subnational NUTS2 or local NUTS3.	
14.1.4.e Scale of planning - transnational other Member State(s) involved - conditional field that has to be reported when the scale of planning is transnational.	
14.1.4 Scale of planning - further information - optional	
14.1.5 Current status of implementation - mandatory	a_planned
14.2.1 Implementation timeframe for the measure - mandatory	Till 2032
14.2.1.c Implementation timeframe for the measure - Specific period (specify YYYY-YYYY) - conditional field that has to be reported when the implementation timeframe is a specific period.	
14.3.1 Description of the measure - mandatory	För att få en tydlig bild av vad som krävs för att uppfylla förordningens mål och krav om arternas livsmiljöer, behövs en fortsatt analys av vilka åtgärder som totalt sett är nödvändiga för arternas livsmiljöer. Analysen behöver omfatta effekterna av övriga åtgärder i planen, och även en bedömning av ett eventuellt behov av återetablering av livsmiljöer för arter. Utöver det kan det behövas särskilda analyser för vissa artgrupper och ekosystem. Det gäller särskilt gräsmarkernas arter knutna till exempelvis öppna gräsmarker, lövängar, trädklädda betesmarker, samt torra och blöta ängsmarker. Men också för flera skogslevande arter. Det behövs också ökad kunskap och fördjupade analyser av klimatförändringarnas effekter och förutsättningarna för arters bevarande i landet. Urbana miljöer utgör viktiga livsmiljöer för ett antal svenska arter med ogynnsam bevarandestatus. Behovet av åtgärder i den urbana miljön i syfte att bibehålla eller skapa viktiga miljöer behöver också ingå i den fortsatta analysen.
14.3.2.a Contributions to targets and obligations - target - mandatory	Art4
14.3.2.b Contributions to targets and obligations - sub-target - mandatory	4_1 ;4_7 ;4_10 ;4_11 -4_12
14.3.3 Pressures addressed by the measure - optional	
14.4.1.a Uniform description of measure - one or more types of measures - mandatory	NRPM_160
14.4.1.a Uniform description of measure - additional information when "other" or "undefined" measure is selected - conditional field that has to be reported for other or undefined measures.	
14.4.1.b Uniform description of measure - one or more habitat types for measures targeting Art.4 or Art.5 - optional	
14.5.1.a Best estimate of estimated surface area or length subject to the measure - optional	
14.5.1.a Minimum estimated surface area or length subject to the measure - optional	
14.5.1.a Maximum estimated surface area or length subject to the measure - optional	
14.5.1.b Unit of the estimated surface area or length subject to the measure - optional	
14.5.1.c Unknown estimated surface area or length subject to the measure - optional	
14.5.3.a Location relative to Natura 2000 - mandatory	Åtgärd planerad både inom och utanför Natura 2000
14.5.3.b Natura 2000 site(s) affected by the measure: provided as semicolon separated values - optional	
14.5.4 Tailored programme in outermost regions, if appropriate (Art.15(3)(o)) - conditional field that has to be reported by the countries with outermost regions, but is not applicable to all others.	
14.7.1.a Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - national conservation and management measures - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.1.b Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - joint recommendations through the regionalisation procedure under Article 18 of the Regulation (EU) No 1380/2013 - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.2.a Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the consultation with other Member States and the relevant advisory councils (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	

14.7.2.b Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the submission of any joint recommendations (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.c Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more habitat types involved - optional	
14.7.2.d Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more fisheries involved - optional	
14.7.3 Measure adopted under the common agricultural policy (CAP) (Art.15(5)) - overview of the interplay between the measure and the national CAP strategic plan - optional	
14.7.4 Measure in synergy with measures planned in the national restoration plans of other Member States - list of the Member State(s) concerned. - optional	

14.1.1.a Name of the measure - Full name - mandatory	Kunskapsunderlag och samverkan om predatorkontrollerande insatser för hotade fågelarter
14.1.1.b Name of the measure - Unique measure ID - mandatory	SE_B.10_Art4_(204)
14.1.2 Main ecosystem type concerned - mandatory	B.10 Other ecosystems
14.1.2.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is the main ecosystem type concerned.	Framför allt handlar det om viktiga strandängar/gräsmarker, men även andra livsmiljöer som t.ex. slättlandssjöar med omkringliggande strandängar, vassmiljöer samt särskilt värdefulla områden i skärgårdsmiljöer
14.1.3 Other ecosystem types concerned - optional	B.1 Wetland ecosystems (coastal and inland); B.9 Marine ecosystems
14.1.3.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is among the additional ecosystem types concerned.	
14.1.4 Scale of planning - mandatory	a_national
14.1.4.b,c,d Scale of planning - NUTS - conditional field that has to be reported when the scale of planning is sub-national NUTS1 or subnational NUTS2 or local NUTS3.	
14.1.4.e Scale of planning - transnational other Member State(s) involved - conditional field that has to be reported when the scale of planning is transnational.	
14.1.4 Scale of planning - further information - optional	
14.1.5 Current status of implementation - mandatory	a_planned
14.2.1 Implementation timeframe for the measure - mandatory	Till 2032
14.2.1.c Implementation timeframe for the measure - Specific period (specify YYYY-YYYY) - conditional field that has to be reported when the implementation timeframe is a specific period.	
14.3.1 Description of the measure - mandatory	Framtagande av kunskapsunderlag om var behoven är som störst för predationskontrollerande insatser och att kartlägga vilka åtgärder som ger störst nytta. Alternativa åtgärder och verktyg utöver jakt bör också utredas, exempelvis övervakning i fält, viltkameror, stängsling och röjande av buskmark och stolpar eller andra strukturer i syfte att minska utrymmet för vissa predatorers häckning och tillgång till spaningsplatser med mera. I förslaget ingår även att i dialog med olika aktörer verka för att öka predatorkontrollerande insatser i fält, t.ex. genom kunskapsutbredning och samverkan mellan myndigheter och organisationer på regional och lokal nivå. Samverkan bör även omfatta möjliga finansieringskällor för utökade insatser i fält, exempelvis finansieringsformer för att täcka kostnader för insatser i lokala projekt eller utrustning som krävs för att genomföra relevanta åtgärder.
14.3.2.a Contributions to targets and obligations - target - mandatory	Art4
14.3.2.b Contributions to targets and obligations - sub-target - mandatory	4_7 ;4_9
14.3.3 Pressures addressed by the measure - optional	
14.4.1.a Uniform description of measure - one or more types of measures - mandatory	NRPM_154;NRPM_160
14.4.1.a Uniform description of measure - additional information when "other" or "undefined" measure is selected - conditional field that has to be reported for other or undefined measures.	
14.4.1.b Uniform description of measure - one or more habitat types for measures targeting Art.4 or Art.5 - optional	
14.5.1.a Best estimate of estimated surface area or length subject to the measure - optional	
14.5.1.a Minimum estimated surface area or length subject to the measure - optional	
14.5.1.a Maximum estimated surface area or length subject to the measure - optional	
14.5.1.b Unit of the estimated surface area or length subject to the measure - optional	
14.5.1.c Unknown estimated surface area or length subject to the measure - optional	
14.5.3.a Location relative to Natura 2000 - mandatory	Åtgärd planerad både inom och utanför Natura 2000
14.5.3.b Natura 2000 site(s) affected by the measure: provided as semicolon separated values - optional	
14.5.4 Tailored programme in outermost regions, if appropriate (Art.15(3)(o)) - conditional field that has to be reported by the countries with outermost regions, but is not applicable to all others.	
14.7.1.a Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - national conservation and management measures - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.1.b Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - joint recommendations through the regionalisation procedure under Article 18 of the Regulation (EU) No 1380/2013 - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.2.a Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the consultation with other Member States and the relevant advisory councils (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.b Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the submission of any joint recommendations (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.c Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more habitat types involved - optional	
14.7.2.d Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more fisheries involved - optional	
14.7.3 Measure adopted under the common agricultural policy (CAP) (Art.15(5)) - overview of the interplay between the measure and the national CAP strategic plan - optional	
14.7.4 Measure in synergy with measures planned in the national restoration plans of other Member States - list of the Member State(s) concerned. - optional	

14.1.1.a Name of the measure - Full name - mandatory	Satsning på åtgärder för fjärlar i prioriterade landskapsavsnitt
14.1.1.b Name of the measure - Unique measure ID - mandatory	SE_B.2_Art4;Art11_(205)
14.1.2 Main ecosystem type concerned - mandatory	B.2 Grassland ecosystems
14.1.2.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is the main ecosystem type concerned.	
14.1.3 Other ecosystem types concerned - optional	B.4 Forests and woodland ecosystems
14.1.3.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is among the additional ecosystem types concerned.	
14.1.4 Scale of planning - mandatory	a_national
14.1.4.b,c,d Scale of planning - NUTS - conditional field that has to be reported when the scale of planning is sub-national NUTS1 or subnational NUTS2 or local NUTS3.	
14.1.4.e Scale of planning - transnational other Member State(s) involved - conditional field that has to be reported when the scale of planning is transnational.	
14.1.4 Scale of planning - further information - optional	
14.1.5 Current status of implementation - mandatory	a_planned
14.2.1 Implementation timeframe for the measure - mandatory	Till 2032
14.2.1.c Implementation timeframe for the measure - Specific period (specify YYYY-YYYY) - conditional field that has to be reported when the implementation timeframe is a specific period.	

14.3.1 Description of the measure - mandatory	En femårig satsning där åtgärder för fjärlilar fokuseras till prioriterade landskapsavsnitt. I åtgärden ingår att analysera och utreda möjligheter till omfördelning och prioritering av befintliga styrmedel för att kunna genomföra åtgärder som behövs för de berörda arternas livsmiljöer. Restaurering och fortsatt hävd av ängs- och betesmarker, röjning av igenväxning, skapande av blomrika miljöer samt bevarande av värdväxter är exempel på åtgärder som kan gynna fjärlilarna i gräsmarker. Även åtgärder i skog, myr och fjäll kan behöva ske i olika omfattning. Det viktiga är att se till landskapets sammansättning och var lämpliga biotoper finns. Det kan, beroende på vilken art som är i fokus för åtgärderna, handla om att sköta infrastrukturmiljöer som korsar skogsmark och rikkärr, bredda vägkantsavsnitt på mindre vägar som löper genom både skog och öppen mark där värdväxter för fokusarter påträffas till att små öppna biotoper på tidigare betad skogsmark bibehålls, sköta ljusöppna och betespräglade skogar för att bibehålla en ljusöppenhet och se till att rikkärr och våtmarker inte växer igen, samt att bevara fjällnära skogar.
14.3.2.a Contributions to targets and obligations - target - mandatory	Art4;Art11
14.3.2.b Contributions to targets and obligations - sub-target - mandatory	4_7 ;4_1 ;4_4 ;4_10 ;11_1
14.3.3 Pressures addressed by the measure - optional	
14.4.1.a Uniform description of measure - one or more types of measures - mandatory	NRPM_004;NRPM_149;NRPM_003;NRPM_002;NRPM_005;NRPM_016;NRPM_017;NRPM_018;NRPM_021
14.4.1.a Uniform description of measure - additional information when "other" or "undefined" measure is selected - conditional field that has to be reported for other or undefined measures.	
14.4.1.b Uniform description of measure - one or more habitat types for measures targeting Art.4 or Art.5 - optional	
14.5.1.a Best estimate of estimated surface area or length subject to the measure - optional	
14.5.1.a Minimum estimated surface area or length subject to the measure - optional	
14.5.1.a Maximum estimated surface area or length subject to the measure - optional	
14.5.1.b Unit of the estimated surface area or length subject to the measure - optional	
14.5.1.c Unknown estimated surface area or length subject to the measure - optional	
14.5.3.a Location relative to Natura 2000 - mandatory	Åtgärd planerad både inom och utanför Natura 2000
14.5.3.b Natura 2000 site(s) affected by the measure: provided as semicolon separated values - optional	
14.5.4 Tailored programme in outermost regions, if appropriate (Art.15(3)(o)) - conditional field that has to be reported by the countries with outermost regions, but is not applicable to all others.	
14.7.1.a Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - national conservation and management measures - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.1.b Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - joint recommendations through the regionalisation procedure under Article 18 of the Regulation (EU) No 1380/2013 - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.2.a Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the consultation with other Member States and the relevant advisory councils (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.b Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the submission of any joint recommendations (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.c Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more habitat types involved - optional	
14.7.2.d Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more fisheries involved - optional	
14.7.3 Measure adopted under the common agricultural policy (CAP) (Art.15(5)) - overview of the interplay between the measure and the national CAP strategic plan - optional	
14.7.4 Measure in synergy with measures planned in the national restoration plans of other Member States - list of the Member State(s) concerned. - optional	
14.1.1.a Name of the measure - Full name - mandatory	Satsning på skötsel av skyddsvärda träd med fokus på vedlevande leddjur
14.1.1.b Name of the measure - Unique measure ID - mandatory	SE_B.2_Art4;Art12_(206)
14.1.2 Main ecosystem type concerned - mandatory	B.2 Grassland ecosystems
14.1.2.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is the main ecosystem type concerned.	
14.1.3 Other ecosystem types concerned - optional	B.4 Forests and woodland ecosystems
14.1.3.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is among the additional ecosystem types concerned.	
14.1.4 Scale of planning - mandatory	a_national
14.1.4.b,c,d Scale of planning - NUTS - conditional field that has to be reported when the scale of planning is sub-national NUTS1 or subnational NUTS2 or local NUTS3.	
14.1.4.e Scale of planning - transnational other Member State(s) involved - conditional field that has to be reported when the scale of planning is transnational.	
14.1.4 Scale of planning - further information - optional	
14.1.5 Current status of implementation - mandatory	a_planned
14.2.1 Implementation timeframe for the measure - mandatory	Till 2032
14.2.1.c Implementation timeframe for the measure - Specific period (specify YYYY-YYYY) - conditional field that has to be reported when the implementation timeframe is a specific period.	
14.3.1 Description of the measure - mandatory	En femårig satsning där åtgärder fokuseras till prioriterade landskapsavsnitt. I åtgärden ingår att analysera och utreda möjligheter till omfördelning och prioritering av befintliga styrmedel för att kunna genomföra åtgärder som behövs för de berörda arternas livsmiljöer. Satsningen bör fokusera på skötselåtgärder för att bevara befintliga gamla ädellövträd och säkerställa tillgång på efterträdare i områden med förekomster av de arter som omfattas av förordningen och som är beroende av dessa träd; läderbagge, större ekbock och hålträdslokrypare. Dessutom behöver skötselåtgärder för att skapa bättre spridningsmöjligheter för arterna genomföras. Skötselåtgärder som föreslås är exempelvis friställning av gamla ädellövträd och deras efterträdare, röjning, stängsling och återinfört bete, veteranisering, utsättning av mulmholkar och beskärning. Även kunskaps- och rådgivningsinsatser kan ingå, liksom kunskapsutbyggande insatser och tillgängliggörande, synkronisering av kunskapsunderlag och förstärkt övervakning.
14.3.2.a Contributions to targets and obligations - target - mandatory	Art4;Art12
14.3.2.b Contributions to targets and obligations - sub-target - mandatory	4_7 ;4_1 ;4_4 ;4_10 ;12_1
14.3.3 Pressures addressed by the measure - optional	
14.4.1.a Uniform description of measure - one or more types of measures - mandatory	NRPM_015;NRPM_149;NRPM_003;NRPM_004;NRPM_005;NRPM_016;NRPM_017;NRPM_018
14.4.1.a Uniform description of measure - additional information when "other" or "undefined" measure is selected - conditional field that has to be reported for other or undefined measures.	
14.4.1.b Uniform description of measure - one or more habitat types for measures targeting Art.4 or Art.5 - optional	
14.5.1.a Best estimate of estimated surface area or length subject to the measure - optional	
14.5.1.a Minimum estimated surface area or length subject to the measure - optional	
14.5.1.a Maximum estimated surface area or length subject to the measure - optional	
14.5.1.b Unit of the estimated surface area or length subject to the measure - optional	
14.5.1.c Unknown estimated surface area or length subject to the measure - optional	
14.5.3.a Location relative to Natura 2000 - mandatory	Åtgärd planerad både inom och utanför Natura 2000
14.5.3.b Natura 2000 site(s) affected by the measure: provided as semicolon separated values - optional	
14.5.4 Tailored programme in outermost regions, if appropriate (Art.15(3)(o)) - conditional field that has to be reported by the countries with outermost regions, but is not applicable to all others.	
14.7.1.a Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - national conservation and management measures - conditional field that has to be reported for measures contributing to Art.5 targets	

14.7.1.b Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - joint recommendations through the regionalisation procedure under Article 18 of the Regulation (EU) No 1380/2013 - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.2.a Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the consultation with other Member States and the relevant advisory councils (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.b Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the submission of any joint recommendations (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.c Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more habitat types involved - optional	
14.7.2.d Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more fisheries involved - optional	
14.7.3 Measure adopted under the common agricultural policy (CAP) (Art.15(5)) - overview of the interplay between the measure and the national CAP strategic plan - optional	
14.7.4 Measure in synergy with measures planned in the national restoration plans of other Member States - list of the Member State(s) concerned. - optional	

14.1.1.a Name of the measure - Full name - mandatory	Samverkansprojekt för vedlevande skalbaggar i skogliga miljöer
14.1.1.b Name of the measure - Unique measure ID - mandatory	SE_B.4_Art4;Art12_(207)
14.1.2 Main ecosystem type concerned - mandatory	B.4 Forests and woodland ecosystems
14.1.2.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is the main ecosystem type concerned.	
14.1.3 Other ecosystem types concerned - optional	
14.1.3.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is among the additional ecosystem types concerned.	
14.1.4 Scale of planning - mandatory	a_national
14.1.4.b,c,d Scale of planning - NUTS - conditional field that has to be reported when the scale of planning is sub-national NUTS1 or subnational NUTS2 or local NUTS3.	
14.1.4.e Scale of planning - transnational other Member State(s) involved - conditional field that has to be reported when the scale of planning is transnational.	
14.1.4 Scale of planning - further information - optional	
14.1.5 Current status of implementation - mandatory	a_planned
14.2.1 Implementation timeframe for the measure - mandatory	Till 2032
14.2.1.c Implementation timeframe for the measure - Specific period (specify YYYY-YYYY) - conditional field that has to be reported when the implementation timeframe is a specific period.	

14.3.1 Description of the measure - mandatory	<p>En femårig satsning där åtgärder fokuseras till prioriterade landskapsavsnitt. I åtgärden ingår även att analysera och utreda möjligheter till omfördelning och prioritering av befintliga styrmedel för att kunna genomföra åtgärder som behövs för de berörda arternas livsmiljöer.</p> <p>Satsningen bör fokuseras till landskapsavsnitt med förekomster, inklusive skapande av spridningsmöjligheter, för arterna.</p> <p>I ett första skede behövs åtgärder som artinventeringar och kartstudier, utpekande av landskapsavsnitt som prioriteras för åtgärder, aktörsanalys samt analys av samverkansformer. Därefter behövs även åtgärder i naturen. För vissa arter handlar det om att nuvarande förekomster, inklusive miljöer som kan utvecklas till lämplig livsmiljö på sikt, undantas från skogsbruk, men också att särskild hänsyn vid brukande tas i prioriterade landskapsavsnitt. Det behövs även punktinsatser, restaurerings- och skötselinsatser i befintliga bestånd och långsiktig skapande av lämpliga miljöer i olika successionsstadier (brandfält) samt återskapande av sumpskog (gynnar främst större barkplattbagge). Inom skogsbruket behöver främst asp lämnas kvar i större utsträckning i prioriterade landskapsavsnitt för att skapa mer substrat på landskapsnivå.</p>
---	---

14.3.2.a Contributions to targets and obligations - target - mandatory	Art4;Art12
14.3.2.b Contributions to targets and obligations - sub-target - mandatory	4_7;4_1;4_10;12_1
14.3.3 Pressures addressed by the measure - optional	
14.4.1.a Uniform description of measure - one or more types of measures - mandatory	NRPM_149;NRPM_016;NRPM_017;NRPM_018;NRPM_019;NRPM_020;NRPM_021;NRPM_029
14.4.1.a Uniform description of measure - additional information when "other" or "undefined" measure is selected - conditional field that has to be reported for other or undefined measures.	
14.4.1.b Uniform description of measure - one or more habitat types for measures targeting Art.4 or Art.5 - optional	
14.5.1.a Best estimate of estimated surface area or length subject to the measure - optional	
14.5.1.a Minimum estimated surface area or length subject to the measure - optional	
14.5.1.a Maximum estimated surface area or length subject to the measure - optional	
14.5.1.b Unit of the estimated surface area or length subject to the measure - optional	
14.5.1.c Unknown estimated surface area or length subject to the measure - optional	
14.5.3.a Location relative to Natura 2000 - mandatory	Åtgärd planerad både inom och utanför Natura 2000
14.5.3.b Natura 2000 site(s) affected by the measure: provided as semicolon separated values - optional	
14.5.4 Tailored programme in outermost regions, if appropriate (Art.15(3)(o)) - conditional field that has to be reported by the countries with outermost regions, but is not applicable to all others.	

14.7.1.a Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - national conservation and management measures - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.1.b Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - joint recommendations through the regionalisation procedure under Article 18 of the Regulation (EU) No 1380/2013 - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.2.a Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the consultation with other Member States and the relevant advisory councils (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.b Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the submission of any joint recommendations (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.c Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more habitat types involved - optional	
14.7.2.d Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more fisheries involved - optional	
14.7.3 Measure adopted under the common agricultural policy (CAP) (Art.15(5)) - overview of the interplay between the measure and the national CAP strategic plan - optional	
14.7.4 Measure in synergy with measures planned in the national restoration plans of other Member States - list of the Member State(s) concerned. - optional	

14.1.1.a Name of the measure - Full name - mandatory	Restaurera skydds zoner mot vatten och våtmarker i skogsekosystem
14.1.1.b Name of the measure - Unique measure ID - mandatory	SE_B.4_Art4_(208)
14.1.2 Main ecosystem type concerned - mandatory	B.4 Forests and woodland ecosystems
14.1.2.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is the main ecosystem type concerned.	
14.1.3 Other ecosystem types concerned - optional	

14.1.3.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is among the additional ecosystem types concerned.	
14.1.4 Scale of planning - mandatory	a_national
14.1.4.b,c,d Scale of planning - NUTS - conditional field that has to be reported when the scale of planning is sub-national NUTS1 or subnational NUTS2 or local NUTS3.	
14.1.4.e Scale of planning - transnational other Member State(s) involved - conditional field that has to be reported when the scale of planning is transnational.	
14.1.4 Scale of planning - further information - optional	
14.1.5 Current status of implementation - mandatory	a_planned
14.2.1 Implementation timeframe for the measure - mandatory	Till 2040 eller 2050
14.2.1.c Implementation timeframe for the measure - Specific period (specify YYYY-YYYY) - conditional field that has to be reported when the implementation timeframe is a specific period.	
14.3.1 Description of the measure - mandatory	Målsättningen med åtgärden är: * att hänsyn i högre grad lämnas till vatten och våtmarker vid skogsbruksåtgärder och * att skötsel sker av skyddszonerna så att dessa uppnår tillräckliga kvaliteter som livsmiljö för fåglar och andra arter. Åtgärden genomförs genom rådgivning till skogsägare och att det i dialog med skogssektorn utveckla arbetet med anpassade brukningsmetoder och bevarandeformer. I åtgärden ingår även att utreda om fåglarna ställer ytterligare behov av skydds zoner jämfört med krav som följd av att uppfylla Vattendirektivet, och vilka ekonomiska och juridiska styrmedel som i så fall kan behöva tillkomma.
14.3.2.a Contributions to targets and obligations - target - mandatory	Art4
14.3.2.b Contributions to targets and obligations - sub-target - mandatory	4_7 ;4_10
14.3.3 Pressures addressed by the measure - optional	
14.4.1.a Uniform description of measure - one or more types of measures - mandatory	NRPM_154;NRPM_149;NRPM_031;NRPM_060
14.4.1.a Uniform description of measure - additional information when "other" or "undefined" measure is selected - conditional field that has to be reported for other or undefined measures.	
14.4.1.b Uniform description of measure - one or more habitat types for measures targeting Art.4 or Art.5 - optional	
14.5.1.a Best estimate of estimated surface area or length subject to the measure - optional	
14.5.1.a Minimum estimated surface area or length subject to the measure - optional	
14.5.1.a Maximum estimated surface area or length subject to the measure - optional	
14.5.1.b Unit of the estimated surface area or length subject to the measure - optional	
14.5.1.c Unknown estimated surface area or length subject to the measure - optional	
14.5.3.a Location relative to Natura 2000 - mandatory	Åtgärd planerad utanför Natura 2000
14.5.3.b Natura 2000 site(s) affected by the measure: provided as semicolon separated values - optional	
14.5.4 Tailored programme in outermost regions, if appropriate (Art.15(3)(o)) - conditional field that has to be reported by the countries with outermost regions, but is not applicable to all others.	
14.7.1.a Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - national conservation and management measures - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.1.b Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - joint recommendations through the regionalisation procedure under Article 18 of the Regulation (EU) No 1380/2013 - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.2.a Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the consultation with other Member States and the relevant advisory councils (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.b Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the submission of any joint recommendations (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.c Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more habitat types involved - optional	
14.7.2.d Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more fisheries involved - optional	
14.7.3 Measure adopted under the common agricultural policy (CAP) (Art.15(5)) - overview of the interplay between the measure and the national CAP strategic plan - optional	
14.7.4 Measure in synergy with measures planned in the national restoration plans of other Member States - list of the Member State(s) concerned. - optional	

14.1.1.a Name of the measure - Full name - mandatory	Permanent förstärkning av styrmedel för restaurering och skötsel av sandiga miljöer på landskapsnivå
14.1.1.b Name of the measure - Unique measure ID - mandatory	SE_B.10_Art4_(209)
14.1.2 Main ecosystem type concerned - mandatory	B.10 Other ecosystems
14.1.2.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is the main ecosystem type concerned.	Främst saynddyner
14.1.3 Other ecosystem types concerned - optional	B.10 Other ecosystems; B.2 Grassland ecosystems; B.8 Urban ecosystems
14.1.3.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is among the additional ecosystem types concerned.	
14.1.4 Scale of planning - mandatory	a_national
14.1.4.b,c,d Scale of planning - NUTS - conditional field that has to be reported when the scale of planning is sub-national NUTS1 or subnational NUTS2 or local NUTS3.	
14.1.4.e Scale of planning - transnational other Member State(s) involved - conditional field that has to be reported when the scale of planning is transnational.	
14.1.4 Scale of planning - further information - optional	
14.1.5 Current status of implementation - mandatory	a_planned
14.2.1 Implementation timeframe for the measure - mandatory	Till 2040 eller 2050
14.2.1.c Implementation timeframe for the measure - Specific period (specify YYYY-YYYY) - conditional field that has to be reported when the implementation timeframe is a specific period.	
14.3.1 Description of the measure - mandatory	Åtgärden innebär att utreda styrmedel för samt genomföra restaurering och skötsel av sandiga livsmiljöer i landskapet. Målsättningen bör i första hand vara att genomföra större restaureringsåtgärder i trakter där det finns möjligheter att återfå täta och stora populationer av arter beroende av öppen sand samt där det finns förutsättningar för att livsmiljön långsiktigt kan bibehålla gynnsam status. Restaureringsåtgärderna bör fokusera på att återskapa strukturer som kännetecknar naturligt störda sandmiljöer, i synnerhet genom ökad andel sandblottor i gynnsamma lägen. Insatserna bör utformas så att de skapar varierade miljöer som gynnar fåglar, insekter och växter.
14.3.2.a Contributions to targets and obligations - target - mandatory	Art4
14.3.2.b Contributions to targets and obligations - sub-target - mandatory	4_7 ;4_1 ;4_4 ;4_10
14.3.3 Pressures addressed by the measure - optional	
14.4.1.a Uniform description of measure - one or more types of measures - mandatory	NRPM_149;NRPM_003;NRPM_004;NRPM_005;NRPM_015;NRPM_016;NRPM_124;NRPM_081;NRPM_093;NRPM_080
14.4.1.a Uniform description of measure - additional information when "other" or "undefined" measure is selected - conditional field that has to be reported for other or undefined measures.	
14.4.1.b Uniform description of measure - one or more habitat types for measures targeting Art.4 or Art.5 - optional	
14.5.1.a Best estimate of estimated surface area or length subject to the measure - optional	
14.5.1.a Minimum estimated surface area or length subject to the measure - optional	
14.5.1.a Maximum estimated surface area or length subject to the measure - optional	
14.5.1.b Unit of the estimated surface area or length subject to the measure - optional	

14.5.1.c Unknown estimated surface area or length subject to the measure - optional	
14.5.3.a Location relative to Natura 2000 - mandatory	Åtgärd planerad både inom och utanför Natura 2000
14.5.3.b Natura 2000 site(s) affected by the measure: provided as semicolon separated values - optional	
14.5.4 Tailored programme in outermost regions, if appropriate (Art.15(3)(o)) - conditional field that has to be reported by the countries with outermost regions, but is not applicable to all others.	
14.7.1.a Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - national conservation and management measures - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.1.b Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - joint recommendations through the regionalisation procedure under Article 18 of the Regulation (EU) No 1380/2013 - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.2.a Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the consultation with other Member States and the relevant advisory councils (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.b Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the submission of any joint recommendations (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.c Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more habitat types involved - optional	
14.7.2.d Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more fisheries involved - optional	
14.7.3 Measure adopted under the common agricultural policy (CAP) (Art.15(5)) - overview of the interplay between the measure and the national CAP strategic plan - optional	
14.7.4 Measure in synergy with measures planned in the national restoration plans of other Member States - list of the Member State(s) concerned. - optional	

14.1.1.a Name of the measure - Full name - mandatory	Sådesfält och rapsfält med låg skördepotential lämnas oskördade till nästkommande år
14.1.1.b Name of the measure - Unique measure ID - mandatory	SE_B.7_Art4;Art11_(210)
14.1.2 Main ecosystem type concerned - mandatory	B.7 Cropland ecosystems
14.1.2.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is the main ecosystem type concerned.	
14.1.3 Other ecosystem types concerned - optional	
14.1.3.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is among the additional ecosystem types concerned.	
14.1.4 Scale of planning - mandatory	a_national
14.1.4.b,c,d Scale of planning - NUTS - conditional field that has to be reported when the scale of planning is sub-national NUTS1 or subnational NUTS2 or local NUTS3.	
14.1.4.e Scale of planning - transnational other Member State(s) involved - conditional field that has to be reported when the scale of planning is transnational.	
14.1.4 Scale of planning - further information - optional	
14.1.5 Current status of implementation - mandatory	a_planned
14.2.1 Implementation timeframe for the measure - mandatory	Till 2032
14.2.1.c Implementation timeframe for the measure - Specific period (specify YYYY-YYYY) - conditional field that has to be reported when the implementation timeframe is a specific period.	
14.3.1 Description of the measure - mandatory	Oskördade fält gynnar ett stort antal födosökande fröätande fågelarter under höst, vinter och vår och bedöms bidra till att flera fågelarter i jordbrukslandskapet återfår tillfredsställande nivåer. För att uppnå varaktiga effekter krävs dock en tillräcklig omfattning och en strategisk tillämpning i landskapet. Åtgärden innebär att utreda hur användningen av oskördade raps- och sådesfält bidrar till att stärka jordbruksfåglars livsmiljöer. Åtgärden möjliggör därmed att mark med begränsad avkastning kan nyttjas på ett sätt som ger ersättning eller annan ekonomisk nytta, samtidigt som biologisk mångfald stärks.
14.3.2.a Contributions to targets and obligations - target - mandatory	Art4;Art11
14.3.2.b Contributions to targets and obligations - sub-target - mandatory	4_7;11_1;11_3
14.3.3 Pressures addressed by the measure - optional	
14.4.1.a Uniform description of measure - one or more types of measures - mandatory	NRPM_006;NRPM_149
14.4.1.a Uniform description of measure - additional information when "other" or "undefined" measure is selected - conditional field that has to be reported for other or undefined measures.	
14.4.1.b Uniform description of measure - one or more habitat types for measures targeting Art.4 or Art.5 - optional	
14.5.1.a Best estimate of estimated surface area or length subject to the measure - optional	
14.5.1.a Minimum estimated surface area or length subject to the measure - optional	
14.5.1.a Maximum estimated surface area or length subject to the measure - optional	
14.5.1.b Unit of the estimated surface area or length subject to the measure - optional	
14.5.1.c Unknown estimated surface area or length subject to the measure - optional	
14.5.3.a Location relative to Natura 2000 - mandatory	Åtgärd planerad utanför Natura 2000
14.5.3.b Natura 2000 site(s) affected by the measure: provided as semicolon separated values - optional	
14.5.4 Tailored programme in outermost regions, if appropriate (Art.15(3)(o)) - conditional field that has to be reported by the countries with outermost regions, but is not applicable to all others.	
14.7.1.a Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - national conservation and management measures - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.1.b Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - joint recommendations through the regionalisation procedure under Article 18 of the Regulation (EU) No 1380/2013 - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.2.a Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the consultation with other Member States and the relevant advisory councils (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.b Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the submission of any joint recommendations (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.c Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more habitat types involved - optional	
14.7.2.d Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more fisheries involved - optional	
14.7.3 Measure adopted under the common agricultural policy (CAP) (Art.15(5)) - overview of the interplay between the measure and the national CAP strategic plan - optional	
14.7.4 Measure in synergy with measures planned in the national restoration plans of other Member States - list of the Member State(s) concerned. - optional	

14.1.1.a Name of the measure - Full name - mandatory	Skötsel av lövbrännor
--	-----------------------

14.1.1.b Name of the measure - Unique measure ID - mandatory	SE_B.4_Art4;Art12_(211)
14.1.2 Main ecosystem type concerned - mandatory	B.4 Forests and woodland ecosystems
14.1.2.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is the main ecosystem type concerned.	
14.1.3 Other ecosystem types concerned - optional	
14.1.3.j Additional information when "other ecosystems" is selected - conditional field that has to be reported when other ecosystems is among the additional ecosystem types concerned.	
14.1.4 Scale of planning - mandatory	a_national
14.1.4.b,c,d Scale of planning - NUTS - conditional field that has to be reported when the scale of planning is sub-national NUTS1 or subnational NUTS2 or local NUTS3.	
14.1.4.e Scale of planning - transnational other Member State(s) involved - conditional field that has to be reported when the scale of planning is transnational.	
14.1.4 Scale of planning - further information - optional	
14.1.5 Current status of implementation - mandatory	a_planned
14.2.1 Implementation timeframe for the measure - mandatory	Till 2040 eller 2050
14.2.1.c Implementation timeframe for the measure - Specific period (specify YYYY-YYYY) - conditional field that has to be reported when the implementation timeframe is a specific period.	
14.3.1 Description of the measure - mandatory	Skötsel av lövsjögårdsbrännorna så att deras livslängd förlängs, och utvecklas efter arters behov. Det ökar möjligheten för flera hackspetsarter att återfå tillfredsställande nivå, däribland vitryggig hackspett. Åtgärden kan även gynna flera vedlevande skalbaggar som omfattas av förordningen, då de är beroende av lövrika bestånd med gamla grova lövträd. Lövbränneliknande områden kan finnas även utan att det har föregåtts av skogsbrand, till exempel i tidvis översvämmade skogar.
14.3.2.a Contributions to targets and obligations - target - mandatory	Art4;Art12
14.3.2.b Contributions to targets and obligations - sub-target - mandatory	4_7;4_10;12_1;12_2
14.3.3 Pressures addressed by the measure - optional	
14.4.1.a Uniform description of measure - one or more types of measures - mandatory	NRPM_031;NRPM_151
14.4.1.a Uniform description of measure - additional information when "other" or "undefined" measure is selected - conditional field that has to be reported for other or undefined measures.	
14.4.1.b Uniform description of measure - one or more habitat types for measures targeting Art.4 or Art.5 - optional	
14.5.1.a Best estimate of estimated surface area or length subject to the measure - optional	
14.5.1.a Minimum estimated surface area or length subject to the measure - optional	
14.5.1.a Maximum estimated surface area or length subject to the measure - optional	
14.5.1.b Unit of the estimated surface area or length subject to the measure - optional	
14.5.1.c Unknown estimated surface area or length subject to the measure - optional	
14.5.3.a Location relative to Natura 2000 - mandatory	Åtgärd planerad både inom och utanför Natura 2000
14.5.3.b Natura 2000 site(s) affected by the measure: provided as semicolon separated values - optional	
14.5.4 Tailored programme in outermost regions, if appropriate (Art.15(3)(o)) - conditional field that has to be reported by the countries with outermost regions, but is not applicable to all others.	
14.7.1.a Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - national conservation and management measures - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.1.b Description of the conservation and management measures to be adopted under the common fisheries policy, where applicable - joint recommendations through the regionalisation procedure under Article 18 of the Regulation (EU) No 1380/2013 - conditional field that has to be reported for measures contributing to Art.5 targets	
14.7.2.a Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the consultation with other Member States and the relevant advisory councils (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.b Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - estimated timing of the submission of any joint recommendations (MM.YYYY-MM.YYYY) - conditional field that has to be reported for joint recommendations	
14.7.2.c Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more habitat types involved - optional	
14.7.2.d Planning of measure to be adopted using the regionalisation procedure under the common fisheries policy - one or more fisheries involved - optional	
14.7.3 Measure adopted under the common agricultural policy (CAP) (Art.15(5)) - overview of the interplay between the measure and the national CAP strategic plan - optional	
14.7.4 Measure in synergy with measures planned in the national restoration plans of other Member States - list of the Member State(s) concerned. - optional
