New Product Assessment

e...	Name	Style Number	Season	Product Cate...	Impact Areas	Eutrophication	Water Scarcity	Resource D...	Chemistry	Gros
	Julie's T-Shirt		Springtime	Shirt	41.1 kg CO2 eq	0.250 kg PO4--- eq	31.3 m3	662 MJ	103 units	1.599
			Bill of Materials		41.1 kg CO2 eq	0.054 kg PO4--- eq	10.9 m3	249 MJ	33.3 units	
			Finished Goods Processes		0 kg CO2 eq	0.196 kg PO4--- eq	20.4 m3	413 MJ	69.3 units	

Higg FEM 3.0 Theory of Change

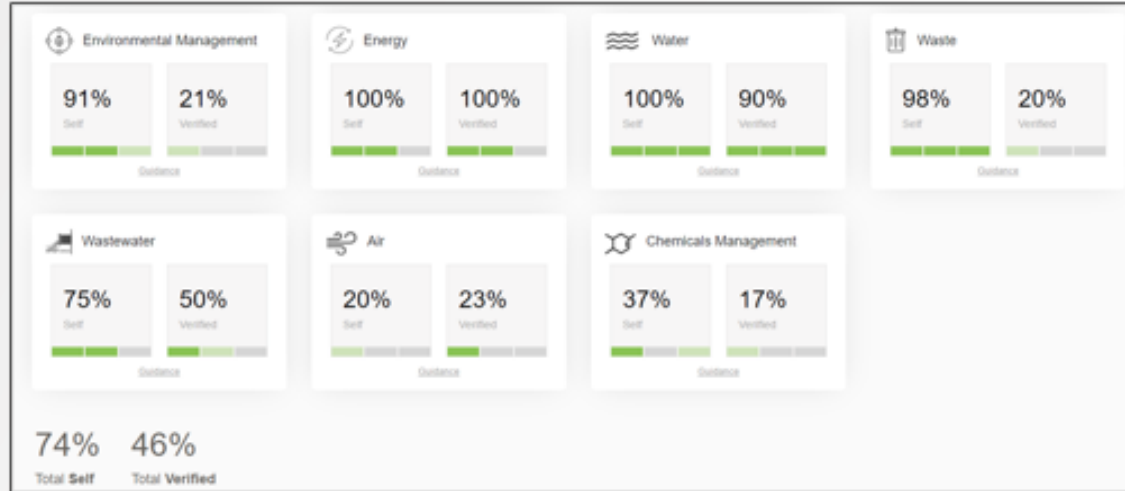

- **One standardized** industry assessment
- Assessment to **track and improve** environmental and social/labor performance
- **Reduce audit fatigue** by sharing one verification with all business partners
- Redirect resources from audit to **improvement**
- Drive honest and **productive partnership** between manufacturers and brands
- Collaborative implementation and **collective action**
- **Transparency** as a driver for change

Section Scores

Impact Area Scores

Step Scores

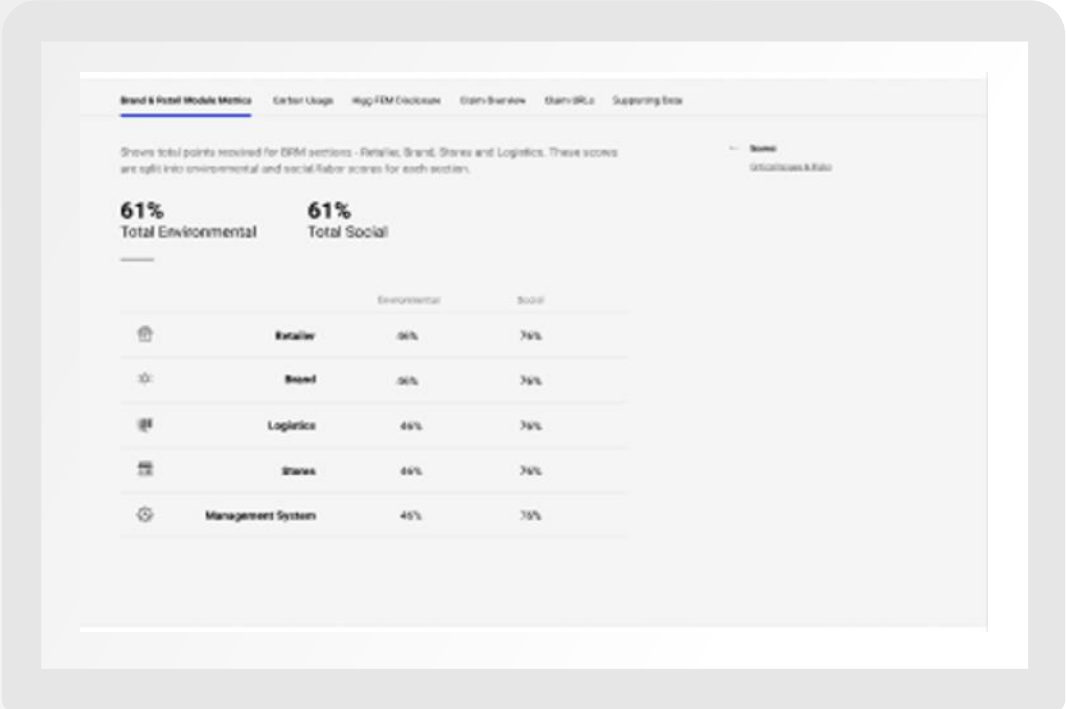

Higg FEM 4.0

Framework Direction

(A Continuous Improvement **Step-Approach**)

- Steps are meant to guide facility from measuring fundamental practices to implementing and demonstrating achievement of aspirational industry practices
- Four Steps available on Higg FEM 4.0 (from Step 0 to Step 3)
 - Step 0 “Fundamental”
 - Step 1 “Foundational”
 - Step 2 “Progressive”
 - Step 3 “Aspirational”
- Every facility will follow this journey, regardless facility size and business nature
- Existing Higg FEM section remains (i.e. Site Info & Permit, EMS, Energy.....) — no new add

Higg FEM data will **associate with Product** Way for Product Differentiation

Brand & Retail Module Metrics | Carbon Usage | Higg FEM Disclosure | Chain Overview | Chain VSLs | Supporting Data

Shows total points received for FEM sections - Retailer, Brand, Stores and Logistics. These scores are split into environmental and social labor scores for each section.

61% Total Environmental | **61%** Total Social

		Environmental	Social
	Retailer	96%	79%
	Brand	96%	79%
	Logistics	44%	79%
	Stores	44%	79%
	Management System	45%	79%
